2011-

2011-

Looking into the future

In FY2011 (April 2011-March 2012), economic activity in the Japanese market stagnated as a result of the effect from the Great East Japan Earthquake, but orders continued to increase in overseas markets, particularly in emerging market countries. In FY2011, consolidated overseas sales reached 51.3% of the total as a result of active international development leveraging its global network, one of its strengths. It was the first time in the Company's history that overseas sales accounted for more than half of the total.

Now, the pace of globalization continues to accelerate. We seek to conduct activities with the aim of creating local ties while collaborating with other Taikisha Group companies in neighboring countries. In response to the needs of society and clients, the Group will be actively engaged in new field such as the plant factory business.

Plant factory

Technical Center

Consolidated net sales by region (billion yen) (FY2020)

Consolidated net sales by business segment (billion yen) (FY2020)

Employee breakdown by region (persons) (FY2020)

R&D expenses (million yen)

(Fiscal year)
